

SAIPEM TRIUNE ENGINEERING PVT. LTD.

Lead Engineer/ Engineer (Pipeline)

- Preparation of Detailed Feasibility report of cross country pipeline.
- Detailed Engineering of cross country pipeline such as ROW Demarcation, various crossing details, design of special crossing, stability analysis, antibuoancy devices, HDD Crossing, underground pipe stress analysis.
- Familiarity with international codes like ASME B 31.4, 31.8, API 1104.
- Exposure for review detailed engineering survey data, pipeline alignment sheets.
- Exposure in telecommunication like SCADA.
- Exposure for liaisoning with various statutory bodies for getting permissions related to pipeline.
- Experience in construction supervision of pipelines will be an added advantage.

Qualification: B.E/ B.Tech Mechanical/ Civil/ Electrical

Experience: 5-10 years in design of cross country pipelines in oil & gas sector.
